But it will take longer if you don't make the appointment. Then 2 months getting some sperm in ya. Then months trying. Could be a year before we conceive I cba with a havv in 2 years

09:03 // It will take longer than a week to see the Rhuemy x

09:02 // I'll change my mind by next week so it doesn't really matter

09:01 // Get the other tablets then

08:59 // That's how my joints will feel if I stop x

Megan Gorst Mad About Whippets

I may be overthinking this but can someone tell me if Bambi looks to thin? I know whippets are slim anyway but you can see her ribs/spine. She's raw fed and she does eat it but she be a fussy little madam. At this point I'm not to bothered when we feed her anymore, as long as she's eating fully and she's healthy. Although keeping her on raw would be preferred. Any tips or tricks on how I can make dinner time more appealing to her? Because she'd eat like a horse if offered a KFC or a packet of quavers
