I've just nearly had to ring an ambulance she was choking for what felt like forever in the dining room I can't stop crying I was putting my hand down her throat to try and get it but couldn't get it out smacking her back wasn't working. Me and Emily we're both screaming crying it was horrendous she sounds really rattly now like she's taken in food the wrong way I don't know what to do

What happened x 13:15 ✓✓

She ok x 13:15 ✓✓

I gave her some food to hold whilst I fed her and she just fed herself but started choking. She's fine but rattly and keeps remembering and crying 😞
