I actually think he will just get better he's weird 11:04

I don't know tbh physical injuries are recoverable. Neurological aren't 11:06 ✓✓

Can you imagine ick taking meds for seizures? My god we will have to put it in the fucking shell outside 11:30

Depends on the size of the meds. Just gonna cost a fortune in meat but it may be the best outcome at the min 11:31 ✓✓

Is he at the one in worsley? 11:32

Yea. He goes at least once a year doesn't he 11:38 ✓✓

Fucking prat he is 11:38

Probs farted or something 11:39

No idea. Just really worried about him. I do think we'll get him home

Can you ring them and tell them to give me info over phone. Apparently they need you to give permission so I can ask about my own dog.

11:41

They've asked if you can ring and confirm my name and number and add it to the account. Pain in the fucking arse. On hold for 15 mins to be told that

11:41

I can but I've told you everything they have said about him

11:42 ✓✓

Can you ring please and give my name as I'm finding it difficult to just sit around worrying

11:42

Thought you didn't like him

11:42 ✓✓

Can you let me know when you've done it please rather than being a

Not sure what that says it'd loud in the restaurant

12:17

They would prefer one person speak to the vets and relay the messages on to other parties. I have added your name on the record but they will only tell you what I have told you.

12:18 ✓✓

I get that but I'm just sat around feeling useless it's frustrating

12:19

I understand that but they will o
tell you the same things. As I ha
experience in the testing they are
doing on him it also makes sense

I understand that but they will only tell you the same things. As I have experience in the testing they are doing on him it also makes sense they tell me. Also if they're talking to me or you they're not with him or other animals. So as frustrating as it may be it isn't beneficial to Icarus

Have you heard anything else?

12:53

I just want to ask them what their gut tells them it is and what outcome they are expecting

12:54

Have you heard anything else?

No 14-15:00

12:54 ✓✓

I've told you she said her gut feeling is neurological but that could mean death or just seizures from time to time or this is it and it's over

12:5

But what are the chances he can make any kind of come home.

Recovery * 12:56

He stood up unaided when they rang just before you rang. That's an amazing progress from what he was like. It's just a waiting game now 12:57 ✓✓

I just don't get what happened how can you be paralysed then not be I'm so confused 12:59

Do we take blue with us tonight? 12:59
